**Wyko RST Plus**

- **Personal Safety Hazards**
  - Tool has moving parts which may create a pinch hazard. Please use caution during operation.

- **Hazards to the Tool**
  - The Wyko is a delicate optical instrument that should be operated carefully.
  - The Wyko is very sensitive to vibration and must be still during a measurement.
  - Always make sure that there is enough space between the lens and the sample to prevent damage.

- **Operating Tool**
  - A qualified user should be able to:
    - Load the sample
    - Adjust focus until fringes are visible
    - Level the sample
    - Acquire the data

  - Reservations – If not present at stated start time, tool is reserved for 15 minutes and is then considered open for general use.

- **Simple Errors.**
  - If the system locks up try restarting the computer.
